### Strawberry Seduction Yarrow

*Achillea millefolium 'Strawberry Seduction'*

Height: 20 inches

Spread: 20 inches

Sunlight: ☉

Hardiness Zone: 4a

#### Description:

Fabulous velvety red flowers with striking gold centers are the main feature of this sturdy and compact yarrow; attractive to hummingbirds; use as a splashy border in a full-sun site

#### Ornamental Features

Strawberry Seduction Yarrow is smothered in stunning red flat-top flowers with gold eyes at the ends of the stems from early to late summer. The flowers are excellent for cutting. Its attractive tomentose ferny leaves remain grayish green in colour throughout the season. The fruit is not ornamentally significant.

#### Landscape Attributes

Strawberry Seduction Yarrow is an herbaceous perennial with a ground-hugging habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a high maintenance plant that will require regular care and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading
- Self-Seeding

Strawberry Seduction Yarrow is recommended for the following landscape applications;

### **Planting & Growing**

Strawberry Seduction Yarrow will grow to be about 20 inches tall at maturity, with a spread of 20 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant should only be grown in full sunlight. It prefers to grow in average to dry locations, and dislikes excessive moisture. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil pH, but grows best in poor soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Strawberry Seduction Yarrow is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our store for more information on how to protect it over the winter months.
