Autumn Moon Full Moon Maple

Acer shirasawanum 'Autumn Moon'

Height: 20 feet

Spread: 20 feet

Sunlight:

Hardiness Zone: 5a

Description:

This new introduction is taking the plant world by storm with its golden foliage tipped in rich red which lasts into summer, followed by vibrant fall color, the effect is stunning; an ideal accent for the bright home landscape

Ornamental Features

Autumn Moon Full Moon Maple has attractive tomato-orange-tipped chartreuse foliage which emerges scarlet in spring. The lobed leaves are highly ornamental and turn outstanding shades of gold and in the fall. Neither the flowers nor the fruit are ornamentally significant.

Landscape Attributes

Autumn Moon Full Moon Maple is a deciduous tree with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree, and should only be pruned in summer after the leaves have fully developed, as it may 'bleed' sap if pruned in late winter or early spring. It has no significant negative characteristics.

Autumn Moon Full Moon Maple is recommended for the following landscape applications;

Planting & Growing

Autumn Moon Full Moon Maple will grow to be about 20 feet tall at maturity, with a spread of 20 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 60 years or more.

This tree does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
