### Little Lanterns Columbine

*Aquilegia canadensis 'Little Lanterns'*

Plant Height: 6 inches

Flower Height: 10 inches

Spread: 10 inches

Sunlight: ○ ● ●

Hardiness Zone: 2a

Other Names: Granny's Bonnet, Crowfoot

#### Description:

Dainty, nodding, bell-shaped red and yellow flowers on a compact, many-branched plant; makes a welcome addition to shade and woodland gardens

#### Ornamental Features

Little Lanterns Columbine is smothered in stunning nodding red bell-shaped flowers with yellow overtones at the ends of the stems from late spring to early summer. The flowers are excellent for cutting. Its attractive lobed compound leaves remain bluish-green in colour throughout the season. The fruit is not ornamentally significant.

#### Landscape Attributes

Little Lanterns Columbine is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Little Lanterns Columbine is recommended for the following landscape applications;

### **Planting & Growing**

Little Lanterns Columbine will grow to be only 6 inches tall at maturity extending to 10 inches tall with the flowers, with a spread of 10 inches. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years.

This plant performs well in both full sun and full shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species.

Little Lanterns Columbine is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our store for more information on how to protect it over the winter months.
