Guacamole Hosta

Hosta 'Guacamole'

Plant Height: 24 inches

Flower Height: 3 feet

Spread: 4 feet

Spacing: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 2a

Other Names: Plantain Lily, Funkia

Description:

A wonderful mid sized variety producing mounds of chartreuse=gold leaves with irregular medium green margins; highly fragrant white flowers appear on tall scapes during the midsummer months; adds color, contrast and texture to beds, borders and containers

Ornamental Features

Guacamole Hosta features dainty spikes of white bell-shaped flowers rising above the foliage in mid summer. Its attractive large textured heart-shaped leaves remain chartreuse in colour with showy emerald green variegation throughout the season.

Landscape Attributes

Guacamole Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

Planting & Growing

Guacamole Hosta will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 4 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 3 feet apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
