## **Description:**

Small red flower with yellow throat and edges; late bloomer

#### **Ornamental Features**

Sammy Russell Daylily features bold red trumpet-shaped flowers with yellow throats and gold edges at the ends of the stems from mid to late summer. The flowers are excellent for cutting. Its grassy leaves remain green in colour throughout the season.

## **Landscape Attributes**

Sammy Russell Daylily is an herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Sammy Russell Daylily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

## **Planting & Growing**

Sammy Russell Daylily will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
