### Oso Easy® Paprika Rose *Rosa 'ChewMayTime'*

Height: 24 inches

Spread: 24 inches

Sunlight: ☉

Hardiness Zone: 5a

Group/Class: Shrub Rose

#### Description:

A true standout rose, blooming all season with abundant orange flowers with bright yellow centers; a low mounding habit makes it perfect for the garden, along walks, or an informal hedge; all roses need full sun and well-drained soil

#### Ornamental Features

Oso Easy Paprika Rose features showy lightly-scented orange flowers with yellow centers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has green deciduous foliage. The oval compound leaves turn yellow in fall.

#### Landscape Attributes

Oso Easy Paprika Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Oso Easy Paprika Rose is recommended for the following landscape applications;

### **Planting & Growing**

Oso Easy Paprika Rose will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
