Autumn Moor Grass

Sesleria autumnalis

Height: 8 inches

Spread: 12 inches

Sunlight: ○ ◐

Hardiness Zone: 4a

Ornamental Features

Autumn Moor Grass' attractive grassy leaves are steel blue in colour on a plant with a spreading habit of growth. The foliage often turns bluish-green in fall.

Landscape Attributes

Autumn Moor Grass is an herbaceous evergreen perennial grass with a ground-hugging habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. It has no significant negative characteristics.

Autumn Moor Grass is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover

Planting & Growing

Autumn Moor Grass will grow to be about 8 inches tall at maturity, with a spread of 12 inches. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This species is not originally from North America. It can be propagated by division.
